SUMMARY

I am a software developer skilled primarily in Full Stack Web Development.

EXPERIENCE

Software Developer Intern, Stargate Club   *Jun 2021 - Present*
- Worked On backend using Nodejs,AWS,for making APIs.
- Understood the workflow of a R2C platform and understood the functioning of technology used.

Mobile Backend Development Intern, Truckapp.ai   *Apr 2021 - Jun 2021*
- Supported the backend time by completing the task efficiently in **40%** of the allotted time.
- Quickly learnt and worked on Serverless Framework, decreasing the team's workload to focus on front-end, used AWS and dynamo DB.

Full Stack Developer Intern, Sewakar   *Jan 2021 - Apr 2021*
- Decreased the deployment costs by **60%** by the use of affordable alternatives.
- Made frontend in React following the design by UI team.
- Made the backend from scratch alone.

PROJECTS

MemeYogi
- Built an engaging platform for sharing memes from scratch using **Node.js.**
- The backend can support any frontend web or android.
- Data Integrity and security of data ensured.
- Link to the repo: https://github.com/shivamsouravjha/Meme_Yogi

Shawn-the-Sheep
- A platform to digitalise the event schedule.
- PostgreSQL and React with Node.js was the tech stack for the project.
- Link: https://github.com/shivamsouravjha/shawn-the-sheep

Book-Your-Sweet
- An effective platform for registering hotels to the government and for booking at hotels.
- The digitalisation of this service was made possible through **Redis** and **Python**.
- Link: https://github.com/shivamsouravjha/Book-Your-Sweet

TakeTaxi
- A modern taxi cab booking platform made from **React** at frontend, **MongoDB** at database and **Node.js** as backend.
- Taxi booking for long routes, depending upon the choice of the user.
- Link:https://github.com/shivamsouravjha/taketaxi

Lightning-McQueen
- A platform to connect customers to serviceman(plumbers, technicians etc).
- A group project made via MERN and deployed in Heroku for a certain period of time.
- HTML, CSS, JavaScript, React, Nodejs, MongoDB was used to build the website, my major role was in setting the structure for the front-end and making the entire backend.
- The most important thing learnt was Time management and systematic flow of work.
- Link- https://github.com/shivamsouravjha/Lightning-McQueen

EDUCATION

Bachelor of Technology, **Electronics and**   *Jun 2019 - Present*
Indian Institute of Information Technology (IIIT),   CPI: 7.7

SKILLS

Programming Languages: C++,C,Python,Javascript
Frontend Development: React,HTML,Bootstrap
Backend Development: Node.js, Express.js
Database: MongoDB,PostgreSQL,Redis,Neo4J,MYSQL
Others: AWS,POSTMAN
